

Blue Ridge Heritage presents

Dr. Denny Casey

**Wondering Why We have No Snow
this Winter?**

Climate Change – Our Inevitable Future?

6:00pm
February 21, 2020
Rotary Field
Stuart, VA

With all the information we are inundated with regarding climate change - some political, some economic, and some scientific -- it's easy for anyone to feel confused and overwhelmed. Some of the questions Dr. Casey will address include:

- How does earth's climate work?
- What's causing climate change?
- What's the scientific evidence?
- How are we being impacted?
- What are the implications for our future?

Casey will be cutting through the jargon and hype and illuminating this critical topic. "We all need to be informed, participating in the conversation, and making wise decisions – not just for us today but for generations to come."

Dr. Casey is a Ph.D. in science curriculum and instruction and, until recently, served as the Director of Education and Public Programs at the Virginia Museum of Natural History. Currently self-employed as a science education consultant he has contracted with the Consortium for Ocean Leadership. Casey serves on the board of the Virginia Association of Science Teachers and is a member of the National Coalition for the Public Understanding of Science.

A resident of Martinsville, Casey serves on the boards of Rotary Club of Martinsville and Patrick Henry Community College. Casey is an elder and active member of First Presbyterian Church of Martinsville.

"I believe environmental education is critical to the health, growth, and vitality of a community and must be available, accessible, and encouraged for all. Whether local, national, or global, the need for an informed, science-based citizenry cannot be overstated."
